# New Frontiers in Maternal-Fetal & Neonatal Care Conference

Friday, March 29, 2019  
Thompson Alumni Center at UNO  
6705 Dodge Street, Omaha, Neb. 68182

## PROGRAM PURPOSE

Examine maternal pregnancy complications, practical approaches to the diagnosis and treatment of neonatal issues and the impact on neurodevelopment and neonatal outcomes, while incorporating the importance of team dynamics and simulation-based training. This event will include didactic lectures, case presentations and offer a new, simulation experience brought to participants by both maternal-fetal and neonatal medicine specialists.

## TARGET AUDIENCE

Physicians (Family Medicine, Pediatrics, Obstetrics, Perinatology and Neonatology), Nurse Practitioners, Physician Assistants, Nurses, Occupational Therapists, Physical Therapists, Speech & Language Pathologists, Respiratory Therapists, Social Workers, and other health care providers.

## MEDICAL KEYNOTE

### Louis Halamek, MD

Professor, Division of Neonatal & Developmental Medicine

## OBJECTIVES

1. Describe recommended practices, current research and quality improvement in neuro-protective care.
2. Discuss stages of skin development, preventative measures and utilization of various dressing types to aid skin integrity in the extremely low birth weight (ELBW) infant.
3. Assess current long-term neonatal developmental outcomes in ELBW infant population.
4. Examine causes and contributing factors of maternal mortality including hemorrhage, hypertension and blood clots.
5. Define briefing, debriefing and simulation, discuss the difference in technical performance and critical incident stress debriefing and illustrate ways to incorporate in practice.
6. Identify methods to reduce team stress, analyze non-healthcare high-risk/high-reliability industries and their methods to reduce stress and discuss organization-wide team building.
7. Demonstrate maternal and neonatal simulation-based training and debriefing utilizing an interactive team and panel-based approach.
