- Links to dozens of bonus teaching videos

WHAT PAST STUDENTS ARE SAYING

- Thank you for such an amazing review course for the C-NNIC certification. I recently received my exam results and I passed on my first try and scored in the "strong" category for each section of the exam. I solely relied on your course and a few sections from a comprehensive neonatal textbook, but your course was the most helpful! Thank you again
- Took the C-NNIC a couple weeks back after viewing the content you offer & scored very strong in all cats! Super review Kathi! Tomorrow I'll take the RNC-NIC & work my way down the NCC list!
- When I first heard about the Neuro NICU certification, I was so excited to take the test. However, I was nervous because there weren't any study guides out for this test. When I heard Synapse was offering a study group for this exam, I joined right away. I learned so much and because of the study group, I passed! I am now certified in neuro NICU. Thanks so much.
